ALLIANCE FOR CONTINUING MEDICAL EDUCATION

The Alliance for Continuing Medical Education (Alliance) is an international membership organization of more than 2,500 individuals devoted to designing and implementing certified continuing medical education (CME) activities for physicians. The Alliance provides professional development opportunities for individuals working in the CME profession, advocates for CME and the profession, and strives to improve health care outcomes. Officially launched in March 1975, the Alliance, representing every sector of the CME community, is the recognized leader and go to resource regarding issues within the CME community.

Membership in the Alliance is open to any individual who is involved in continuing medical education, including (but not limited to) those in medical practice, medical education, government or the pharmaceutical/device industry. In addition to the industry-leading Annual Conference, members benefit on a regular basis from educational and professional development opportunities, networking with colleagues, information exchange, and other supportive services designed to assist them in adapting to the changing health care environment, improving the CME activities offered for physicians, and shaping the future of CME.

Alliance members represent the following sectors:

- Hospitals/Health Systems
- Medical Schools
- Medical Specialty Societies
- Pharmaceutical, Device, Biotech Companies
- Health Care Education Associations
- State Medical Societies
- Medical Education and Communication Companies

The Alliance supports its members in meeting the requirements of the Accreditation Council on Continuing Medical Education's (ACCME) Essentials, Standards and Policies. The ACCME's guidelines insure that educational activities developed for physicians are independent, evidence based and free of any form of bias.

The Alliance for CME is headquartered in Birmingham, Alabama, and can be found online at www.acme-assn.org.
